

I. Problem Description

1. Using the example given in the following link: <https://github.com/openai/glide-text2im/blob/main/notebooks/text2im.ipynb>, try to generate two images with two different prompts. Please hand in your prompts and the corresponding generated images.

II. GLIDE results running on Google Colab

```
prompt = "A snowman with a red scarf and a black hat."
```

```
prompt = "A horse is eating the grass."
```
